

CITY OF HARTFORD

Hillside Avenue Traffic Safety Open House and Pilot

Over the past three years, Hillside Avenue has seen over 100 crashes along the corridor. As part of our efforts for safer streets in Hartford, the City team has been working with partners at the local schools and the Southwest Behind the Rocks NRZ to address traffic safety concerns on **Hillside Ave between Park Terrace and Amherst St.** The proposed treatments include alternating parking, school zone markings, bumpouts, signage, and more. To learn more, please join us for an open house at McDonough School. More information and concepts are also online at www.hartfordct.gov/pz/slowstreets, or contact us at safestreets@hartford.gov or **860-757-9222**.

OPEN HOUSE*
APR 20
11:30AM-1:30PM
@McDonough
Middle School
(111 Hillside Ave)
Find us in the gymnasium!

*Learn more about the event and any updates through our website.

OPEN HOUSE EVENT

An open house is held to share how the project can help slow streets

INSTALL

The pilot design is installed along the street and schools

STUDY

The team evaluates how the project worked based on data and feedback

NEXT STEPS

Designs are updated based on performance

SAFETY IN ACTION

Examples across Hartford

Speed Reduction

On Hampton Street in the Northeast neighborhood, southbound speeding was reduced by HALF.

Stop Sign Compliance

At Rawson School in the Blue Hills neighborhood, the % of people coming to a complete stop or coming to a slow roll increased from 58% to 84% at the intersection with curb extensions.

FROM PILOT TO PERMANENT. The above images show interim treatments intended to improve safety in the shorter term. In the long term, the City is working to transition projects to permanent designs.
